

## F.A.Q (1)

**How to install USBasp driver in Windows 8, as it shows device signature error.**

Ans: - As it is by default device enforcement is enabled, so we have to forcefully disable it for external driver installation such as USBasp.

Steps: -

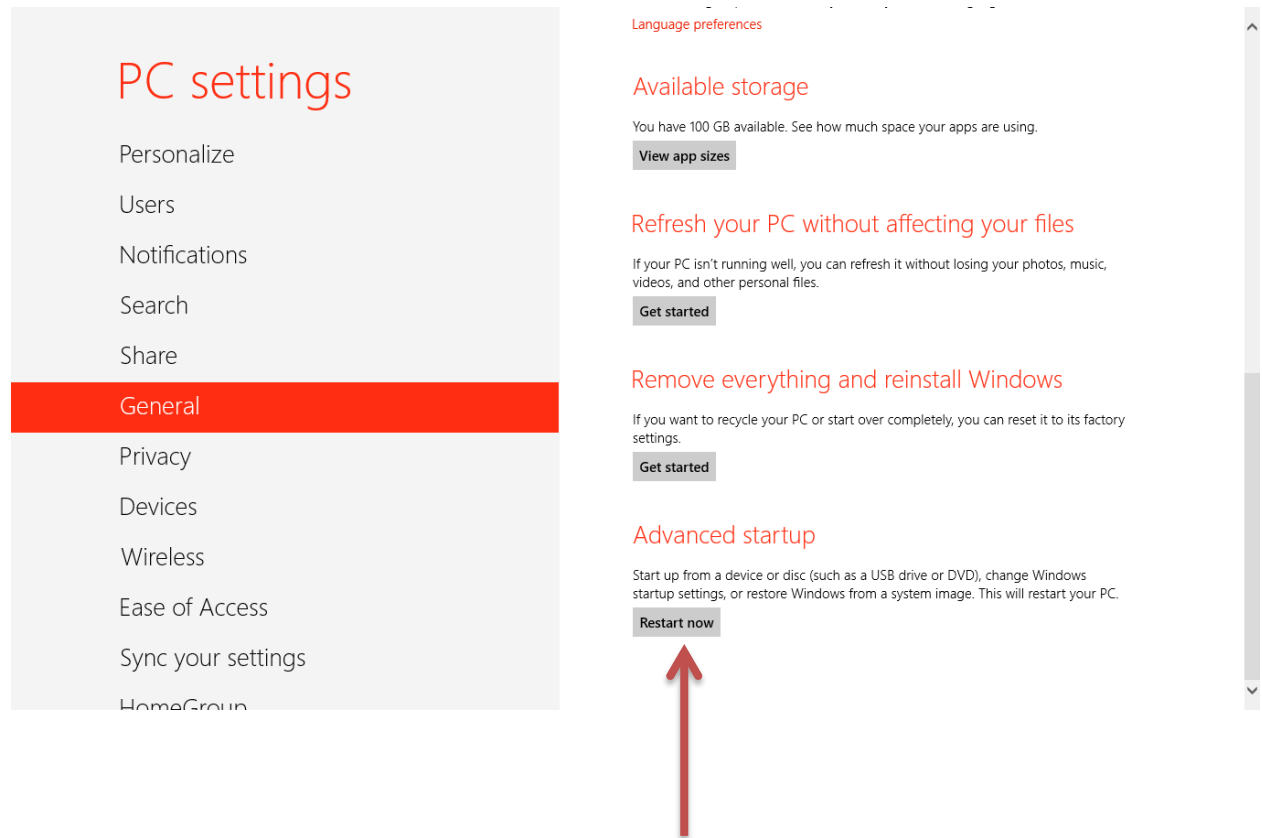

- 1) Press START/WINDOWS button.
- 2) Go to search and click on "Settings"
- 3) Type General

4)

Above window would appear, scroll down and in Advanced Startup setting click on “Restart now.”

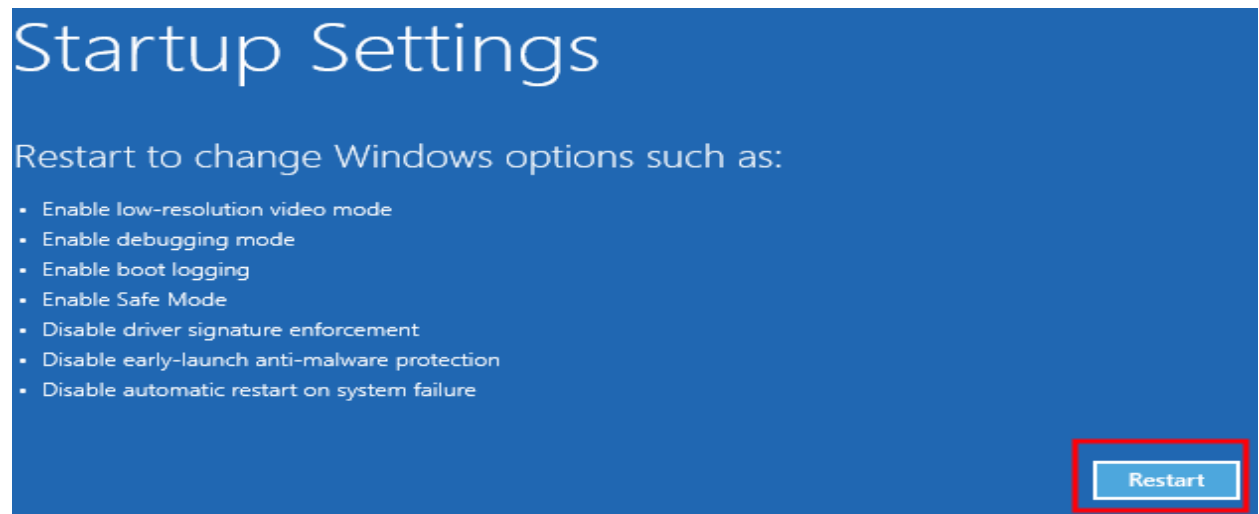

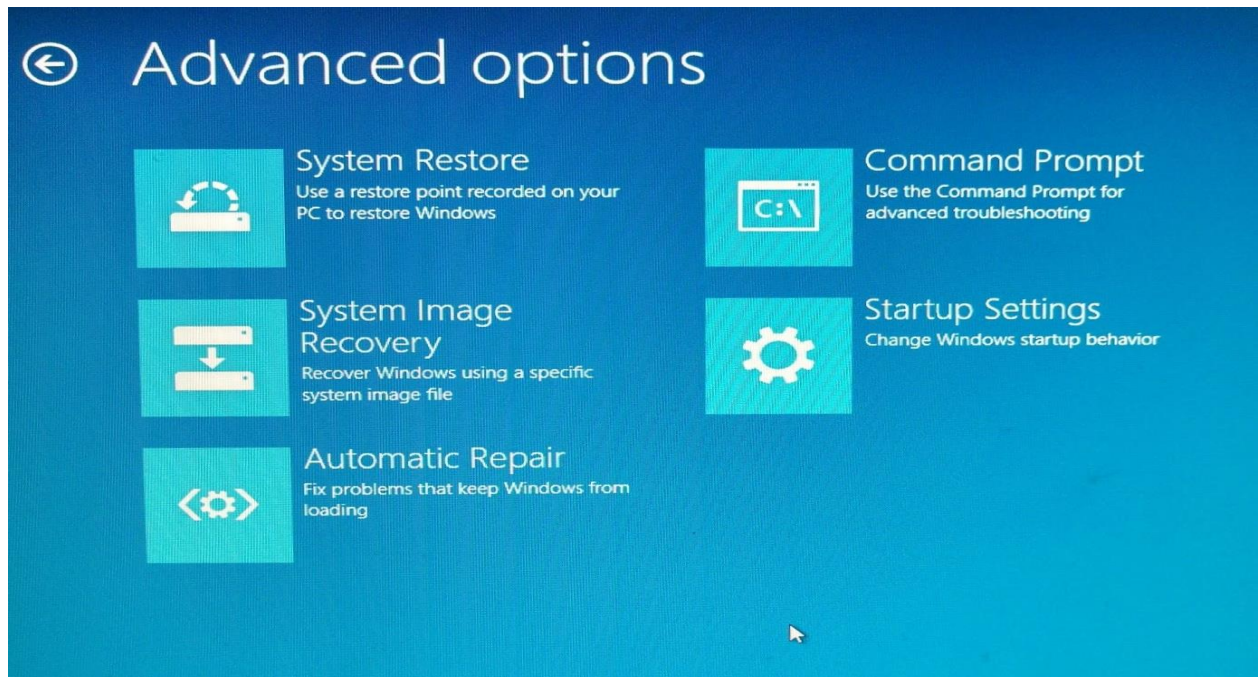

4) After this following window would appear in which select “Troubleshoot”

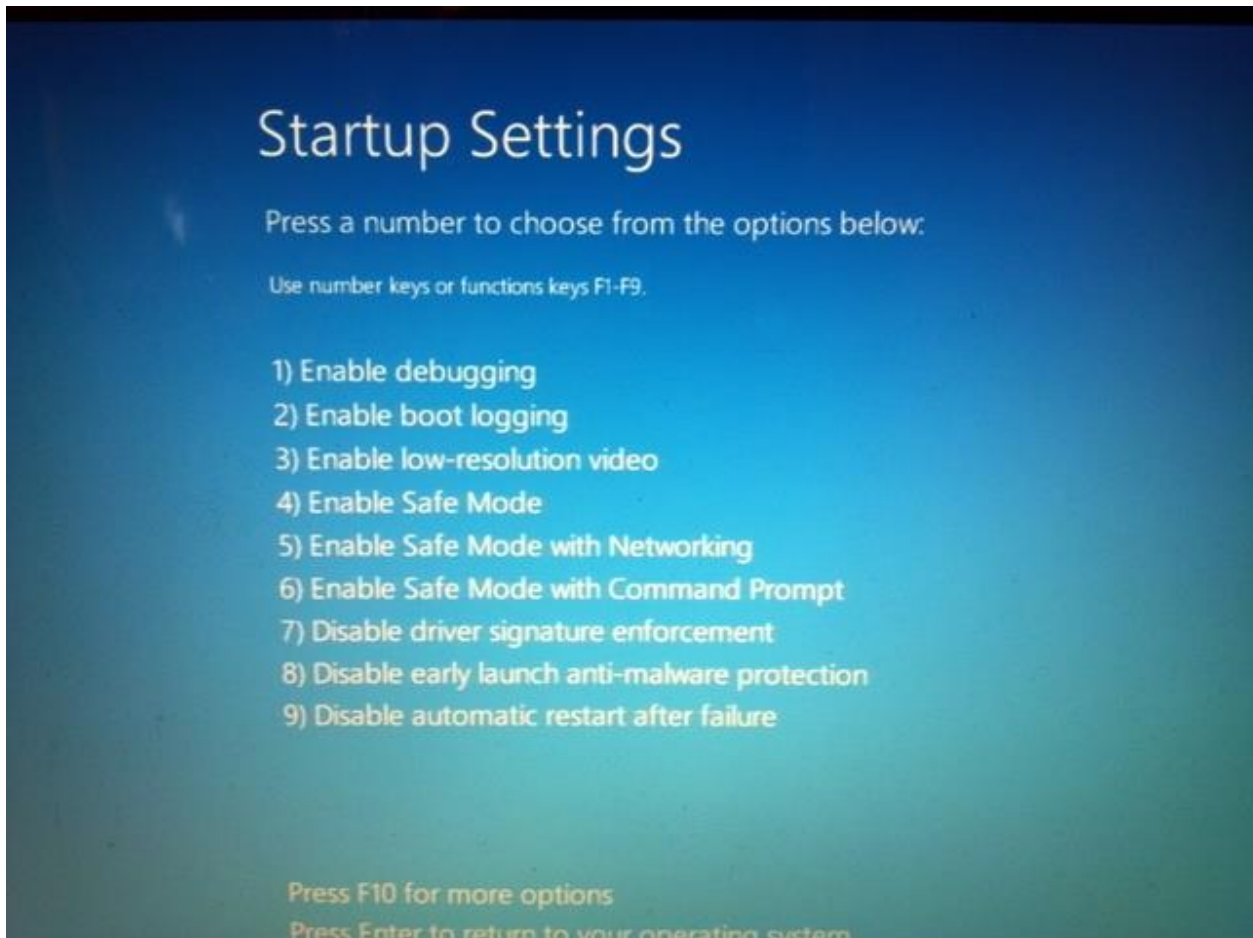

For any query feel free to contact on our 24x7 Helpline numbers: - +91-8826048677, +91-8125653351, +91-9012865832

5) Then click on “Advanced options” then “Startup Settings”
